

## SUCCESS STORY

### **Alayna Chavez**

#### **STC PLUMBING TECHNOLOGY GRADUATE**

**Alayna Chavez graduated** in May 2017 from the STC Plumbing Technology class. After graduation, she interviewed with several plumbers in Sarasota. Alayna chose 'Plumbing Today', where she runs the backflow testing department and drives a pink 'Plumbing Today' service van. "Thanks to Mr. Wolf and the Plumbing program at Suncoast Technical College, I have a great career, a great paying job

and I love going to work!" When asked how the real world environment differs from lab and training in school, Alayna says, "In the real world, you have customers watching you and asking questions. I love talking to them and helping them. You do not have them in the lab." When asked if she would recommend the Plumbing program or other STC programs to others, Alayna's reply was, "Yes! Thanks to Suncoast, I am proud to say that I am now the breadwinner in my family."
